

Your Honorble Judge Robinson

As to a answer to what CMS and DOC has sent happen since then, but let me clear up a few thing concerning there response As of now

First I was refused treatment in my pass letter at CVOB and not here, I'm presently on another sanction here at SVOP and all my legal work is currently over at the Work Release Center, but I do have the name of the doctor that refuse me treatment at that time and will send it to the court for other investigation.

As you are aware from some of my correspondence that I've been suffering pain in my stomach and indeed did have a bad gall bladder, and was seen by two specialist at the time, one of them ordered a bot scan because he didn't believe that my gall bladder was all the problem. he was right because after I got out my gall bladder the pain in my stomach keep hurting me, and still do.

Since I've been down here I have put in so many sick call slips, and CMS lawyer has sent me his discovery and there are only (2) sick call slips in there, and there are no grievance forms that I file either.

I also signed authorization forms as well to retrieve my medical records for various places, that to was never done, here, or in Concord Hill either, what's wrong with this picture.

Since I've been here it took me almost (3) months just to get the doctor to put me in for a colon test to see if I have colon cancer, by the looks of things this will never take place, because CMS doesn't want to spare the financial burden if they find out that I do have cancer.

So in the mean time, I've been made to carry on anyways, because I was caught laying down due to my stomach pain.

Then I was caught again, trying to sleep on the floor because of stomach pains and was abused verbally and made to hold a mattress for some time, I was in a lot pain for the next two to three days on both occasions and was made to stand at the foot pump a couple of times for things like

Slips on that to, because lately what ever it is that's hurting me has gone to my bladder as well and I have to constantly urinate all the time I have discussed this as well with the doctor but it doesn't seem to be important to him.

The C.C.'s don't like it much down here when you write them up, for the things that I have explain in this letter so there found other interesting ways to retaliate against me, this is part of the reason why I'm back at San Juan and I'm sure it's going to be alot more before its over. because I am going to lay down when I don't feel good and I will be reporting back to the court again.

I even ask the doctor for a memo to lay down but he told me he couldn't give it to me and that he would have to put me in the infirmary, I told him to do just that until he finds out whats wrong with me. The last doctor I seeme must really be a ringer and I suppose that's why they sent me to him in here, he didn't care one way or another why, or what was wrong with me, but I did find out one thing, all the times they have been taking my blood pressure and wrote it down in my file there all missing except for one.

Two weeks ago I came over here, S.V.O.P. from C.V.O.P. for such Cell and was told that I wasn't needed at that time, I then made a statement to this black nurse that I was going to file a grievance and he started badmouthing at me, but the C.C.'s came in and wrote me up for not having my T-Shirt tucked in, although all that time before it wasn't a problem they were just looking for some thing at that time to write me up for, but anyway, the other nurse took my vitals and they were high! so he was suppose to take them again, but told me to get out of the infirmary and don't come back, he refuse to see me, so most likely that's why my records have been altered at this time.

But one thing they can't change is the fact that my blood pressure medicine has been change over three times because it has been . . .

your honor, I have made the warden aware of these problems and he has not yet responded to one of my grievances. I'm beginning to think that this place doesn't even have a warden, and I think since he has been aware of the problems here I would like to make him responsible for the current situation here as well, after all, this is his institution. I've also had another nurse who goes by the name of Judy, but I don't know either one of the nurse names because nobody will tell me, but she has refused to give me meds on several times and once she made a statement that I had hepatitis C, instead of several other inmates, which was totally unprofessional.

I just thank god that I have less than two months left to go and when I get out, I intend to take this to the full extent it deserves.

I ask that you consider my amendment again under the 8th amendment. At this time.

I also do believe that as a doctor it is his or her obligation to rule out with out a reasonable doubt the nature of a problem, and not to simply over-look the matter because it would be a gunshot wound or a C.M.S, while all the time I'm suffering pain that I shouldn't be in the last 8 months that anyone in the medical profession would address long before now, even the hospital would have taken better care of me if I was walking in off the street with no insurance, is there no human decency or moral ethics involved here with this company, or the people that work for them.

I have the strange ~~suppose~~ thought that if it is cancer they going to tell me Mrs Collins had you address this problem 8 months ago you would had been alot better off.

Who's gonna take responsibility for my death, or even care for that matter when I'm gone, I'll just be another statistic on some charts some were also concerning the refusal of treatment, yet on some occasions I did refuse treatment because I was abuse, by DOC Staff, such as when I came out of medical the CO's would make me stand by the door for long periods of time while I stood there, and they made small talk, or one

occasion I told officer McGee that I had a trouble saying that I could only stand for a half hour at a time, he made me go get my breakfast tray and stand on the foot prints for almost a hour and eat standing up. Said he was teaching me a lesson about keeping my mouth shut. Also concerning meds that were order for me, this is what this case started out in the first place, because I have hepatitis C and I stated that I couldn't take motrin or tylenol, for fear of doing further damage to my liver, and when I was prescribe these meds they were few and far between, I have waited up to 2 months at one time to get meds renewed.

What I see more than anything else in this case is how these people, lawyer and prosecutor have tried to manipulate this case into some fairy tale story, and according to my better judgment they both should be nominated for a Oscar or emmy award. I'll be out in two months, 3 months from then I'll have access to a computer and a good law library and finally, finding to really show these people that you can walk over some people but I not one of them, I'm very intelligent, I just can't spell very good, but a good computer goes a long way and I type alot better than I write.

Sincerely Yours

Harry T Collins
